Robert M. Nelson, Jr.
Manager
DOE, RFO

Attn: R. J. Schassburger

ACTION TO BRING OU2 INTO RCRA COMPLIANCE - RLB-0727-92

Four spent cyclesorb units (CCs) [Granular Activated Carbon (GAC) vessels with 2000 pounds dry carbon each] are currently stored at OU2 in excess of 90 days. Initial data interpretations indicate the material is both hazardous and radiologically contaminated. The cyclesorb units are not DOT approved. Bulk Back Bins (BBB) have been procured and the first transfer of media successfully completed. The BBB are DOT 56 approved. The following actions are being taken to manage the GAC.

- Remaining GAC will be transferred to BBB.
- BBB will remain at OU2 and inspected weekly until repairs at Unit 18.03 have been completed.
- BBB will be transferred and stored at unit 18.03.

Please feel free to contact Marla Broussard of my staff, at extension 8517, if you have any questions.

R. L. Benedetti
Associate General Manager
Environmental Restoration
